EDWARD WARE

Computer Science · Louisiana Tech University · Class of 2028

edwardware2006@gmail.com · github.com/EdwardWare06 · edwardware06.github.io

EDUCATION

Louisiana Tech University 2024 – 2028

B.S. Computer Science, Honors College · GPA 3.4

North DeSoto High School 2020 – 2023

Diploma with Honors · GPA 3.9 / 4.0

EXPERIENCE

Louisiana Tech × Hunt Forest Products OCT 2025 – NOW

Contract developer · Co-lead Developer & Designer, Maintenance Analytics · Contributing Developer, Operations Analytics

- Help design and build a maintenance analytics dashboard for the LaSalle Lumber mill with a small team, under Dr. Mike O'Neal.
- Contribute views and occasional code to the operations trim-loss monitor.

University Hall, Louisiana Tech SEPT – OCT 2025

Student worker

- Set up for events held in the building.
- Logged and tracked Honors College student records, including grades and progress toward Honors credits.
- Helped other colleges with Honors tasks, such as clearing old offices and moving electronics between departments.

Lambright Sports & Wellness Center MAY – AUG 2025

Desk worker, fitness staff and rock wall operator

- Greeted members and managed check-ins on campus systems.
- Handled incoming calls and member questions.
- Kept the gym and weightlifting areas safe and clean, and ran the indoor rock wall.

ACE Hardware FEB – AUG 2024

Hardware associate

- Ran the register, assembled products such as grills and lawn mowers, and stocked and cleaned the shelves and floor.

PROJECTS

Voice Recorder 2026

A local speaker-ID tool: it transcribes room recordings, splits them by speaker and matches each voice to a team member. Python, FastAPI, faster-whisper, pyannote, SpeechBrain.

Lightning Background 2026

An animated Windows wallpaper: a procedural lightning storm drawn behind the desktop icons. C#, WebView2, WebGL2.

AI email summarizer FALL 2024 – SPRING 2025

Research project with Trylen Stephens: a tool that collects, summarizes and sorts bulk email with local models through Ollama. github.com/Trylen22/Email-scraper

Motion Monitor SPRING 2024

Freshman Design Expo, team of four: AI motion tracking with stepper motors, 3D-printed parts and a mounted monitor, designed, built, coded and presented in three months.

SKILLS

LANGUAGES	**Python · Java · JavaScript · C · C# · HTML · CSS**
TOOLS	**Git and GitHub · Docker · Linux shell · VS Code · IntelliJ IDEA · WebGL2**
ALSO	**API design · prompt engineering · project management · leadership · public relations · teamwork**

ACTIVITIES

Honors Student Advisory Board, College of Engineering and Science FALL 2025 – NOW

Representative and large-event head

Krewe of Champ SPRING 2024 – FALL 2026

Member and event planner

Quiz Bowl Team 2022 – 2023

Volunteering and tutoring 2022 – 2023
